STREAMTECH + ProShip

Achieve automated, efficient, and scalable fulfillment operations.

StreamTech's automated warehouse technology solutions seamlessly integrate with the ProShip product suite, delivering fast, accurate, and efficient warehouse operations, from picking to shipping.

Client Outcomes

Increase Cost Savings

Increase per package savings through automated rate shopping and dimension-based optimization.

Improve Performance & Scalability

Automation and data-driven decisions help shippers scale confidently during peak and beyond.

Increase Supply Chain Visibility

Access real-time parcel data, track transportation, and gain actionable insights across the fulfillment process.

Cohesive Partner Success

Combine automation hardware with intelligent shipping software to form a complete fulfillment solutions build for accuracy, speed, and measurable ROI.

Workflow Automation

Increase throughput and labor efficiency across the pack-to-ship line by automating workflows.

A smarter way to unlock fulfillment ROI.

ROI Snapshot
Outdoor Sports Brand

Before: 45-70 packages/ hour per person

Now: 120 packages/ hour per person

Time Savings: ~7 seconds saved per box (16% faster)

Throughput Gain: +15 packages/hour per person

Labor Cost Impact: ~$1 savings per box

Automation and intelligent rate optimization deliver measureable ROI in months, not years.

Hardware in motion. Software in Sync.

ProShip's cutting-edge multi-carrier shipping software ensures every shipment moves with efficiency at the best possible rate, while StreamTech's Warehouse Control System (WCS) coordinates labelers, scanners, and conveyors in real-time. Together, they form a complete fulfillment solution built for accuracy, speed, and measurable ROI.

How ProShip customers win with StreamTech:

Accelerate Fulfillment

Automated workflows and real-time software decisions enable high-speed processing up to 60+ CPM.

Reduce Operational Errors

Integrating StreamTech with ProShip reduces manual data entry and labeling mistakes, improving accuracy.

Improve Shipping Efficiency

Automate workflows to eliminate manual labor in scanning, weighing, labeling, and sorting.

End-to-End Visibility

Real-time data flows directly from StreamTech's hardware into ProShip's software for optimized shipping logic and visibility across every order and carrier.

Reduce Shipping Costs

ProShip's automated rate shipping and StreamTech's dimension-based optimization reduces per-package costs.

" Our partnership with ProShip has been one of the most consistent and rewarding collaborations in our company's history. For more than 18 years, we've worked together on scores of successful projects, continually pushing the limits of what shipping automation can achieve.

ProShip's cutting edge shipping software and near-instant response aligns with our software and material handling systems to deliver exceptionally fast, accurate, and scalable solutions. Together, we've helped our customers turn shipping from a bottleneck into a competitive advantage. **"**

– Bob Miller, President, StreamTech

Who is ProShip?

ProShip, Inc. is a leading enterprise multi-carrier shipping software provider with decades of proven performance across global retail, manufacturing, healthcare, and e-commerce operations. We deliver powerful, highly configurable shipping execution solutions designed to optimize parcel workflows, reduce transportation costs, and ensure carrier compliance at scale. ProShip specializes in intelligent rate-shopping, carrier-certified labeling, rules-based decision logic, and advanced shipping automation, with core capabilities that drive speed, accuracy, and efficiency in high-volume fulfillment environments. By integrating seamlessly with WMS, ERP, OMS platforms and automation partners, they help complex operations achieve cost savings, improve visibility, and streamline multi-carrier execution.
